Profile

I'm Ubeid Hussein, to keep it short, I like making games and I've been making games for more than 4 years now, from small game jams to bigger releases. I've gathered experience with working alone and with teams, using free and industry standard software. Since I'm self taught, I had to find to figure out what exactly these years made me into, and the best description, I found was Technical Artist. My strong math and coding background with my fascination with 3D modeling has led me to understand the whole 3d asset creation pipeline along with particle and shader creation.
Before I was modding for Team Fortress 2, so I've been making things for games more than a decade now. My portfolio should have many examples of these works.

Education

Universty of Applied Scienes(TAMK)
Bachelor of Engineering (B.Eng) in Information Technology(Computer Science)

01/2022 - Present

Region Vocational College Tredu(TEKLU)
Automation and Electrical technician

01/2015 - 05/2018

Employment History

Arts and Assets specialist at No Bright Shadows, Fully Remote

01/2022 - Present

Years of freelance and personal projects finally got my foot in the door in the game industry. I am one of two modelers at NBS. I specialize in characters and anything rigged. I also utilize my Technical Artist skills to create particle effects and shaders for the game.

Data Entry at Verwijnen & Verwijnen, Helsinki

01/2021 - 01/2022

I organized and maintained both electronic and physical records for company expenses. Sinse the company had many sub-contractors, I also had to get in touch with these people when physical records were lacking

Maintenance technician at City of Kauniala Hospital, Kauniala

07/2019 - 07/2020

Part of a maintenance crew at the City hospital, I was part of a team ensuring that the hospital was kept maintained.
